About Us

Since 1982, Executive Wood Products has been designing, engineering, and manufacturing quality wood furniture and fixtures. We operate out of our ever-evolving 43,000 sq. ft. production facility located in Sullivan, Missouri.

We take great pride in our work and the products we build. We are recognized as one of the Top 50 Small Businesses in St. Louis, have been featured as a Top Small Business in the Congressional Spotlight, are recognized by the Governor and Lieutenant Governor of Missouri as an essential manufacturer, and a member of Buy Missouri.

What We Do

Static Safety

Static Hardening is taking things that are already in a building, business, or home and turning them into security features. Examples include doors, windows, and walls. They are completely low profile, so no one will know they are completely bullet resistant.

Tactical Safety

Tactical Hardening means you can maneuver the object. Workstations and mobile panels move seamlessly on wheels, tables can be flipped onto their sides, and shields can be held. All of these products can move from room to room, or location to location.

Custom Wood Furnishings

We manufacture a standard line of wood office furnishings, but also work with our customers to create furnishings that are custom and specific to their needs. This includes matching our furnishings to blend in with the current courthouse environment.

Lecterns & Podiums

We have held a GSA Contract since 1995 and are the leading supplier of lecterns and podiums to the U.S. federal government in the category of Furniture/Lecterns (71-304). We also manufacture innocuous anti-ballistic workstations for guards at entrances.

STATIC SAFETY

ANTI-BALLISTIC DOORS

NIJ III Bullet-Resistant Door (Slab)

Achieve unparalleled security with our NIJ 3-rated solid wood slab door, expertly crafted with ballistic steel at its core. Encased in premium solid wood, this door combines robust protection against rifle threats with a refined, professional appearance. Designed without windows, it offers maximum privacy and security, making it ideal for schools, offices, courthouses, or other high-risk environments.

NIJ 3/3A Commercial Ballistic Door

Enhance classroom or commercial safety with this all-wood ballistic door, designed to withstand threats while maintaining a professional appearance. The solid wood construction is reinforced with NIJ Level III ballistic protection, while the narrow 6-inch-wide NIJ Level IIIA polycarbonate window provides visibility without compromising security. Perfect for schools, offices, or high-risk facilities, this door offers a balance of durability, functionality, and peace of mind. Smooth operation and expert craftsmanship ensure it's built to last in demanding environments.

STATIC SAFETY

ANTI-BALLISTIC DOORS

NIJ III Bullet-Resistant Door (Half Vision)

Combine strength and visibility with our NIJ 3 ballistic door featuring a half-vision NIJ 3A-rated window. The door's solid wood slab construction encases ballistic steel, providing superior protection against rifle threats, while the integrated window withstands handgun threats, ensuring safety without sacrificing sightlines. Ideal for environments where both security and visibility are essential, this door is perfect for offices, schools, or secure facilities.

NIJ 3A Bullet-Resistant Door (Full View)

Designed with schools in mind, this door provides clear visibility while utilizing durable, NIJ 3A rated polycarbonate to resist common threats, including forced entry and impact. Its elegant design allows natural light to flow through, creating a welcoming environment without compromising security. Perfect for classrooms, offices, or entryways.

STATIC SAFETY

ANTI-BALLISTIC GLASS

Protect your personnel with high-performance NIJ 3A bullet-resistant polycarbonate glass panels. Engineered to provide superior protection, these panels are designed to withstand handgun threats while maintaining clarity and durability. Custom-cut to your specifications, they seamlessly fit over your existing windows, offering a cost-effective and non-invasive security solution. Ideal for offices & courthouses, our polycarbonate panels ensure peace of mind without compromising visibility.

TACTICAL SAFETY

ANTI-BALLISTIC PANELS

Tactical Tack-able™ Anti-Ballistic Panel

Ensure student safety with the Tactical Tack-able™ Anti-Ballistic Panel, offering 24 sq. ft. of NIJ Level III ballistic protection to stop multiple shots from a 7.62mm (.308) rifle or smaller. Designed for schools and other high-risk environments, this portable, tackable surface is both a protective shield and a practical display tool. Despite its robust 400-lb construction, smooth casters make it easy for even a small child to maneuver, ensuring quick adaptability in critical situations. Dimensions: 75"h x 48"w x 3.25"d (32"d with casters).

Tactical Signage™ Anti-Ballistic Panel

A versatile, portable panel offering 24 sq. ft. of NIJ Level III ballistic protection, stopping 7.62mm (.308) rifle rounds or smaller. Featuring a 44.5"W x 31.125"H interchangeable sign, tackable fabric on the reverse side, and heavy-duty locking casters for mobility. Dimensions: 75"h x 48"w x 3.25"d (32"d with casters).

TACTICAL SAFETY

ANTI-BALLISTIC PANELS

Tactical Scholar™ Anti-Ballistic Panel

Prioritize school safety with this versatile portable panel, providing 24 sq. ft. of NIJ Level III ballistic protection, capable of stopping 7.62mm (.308) rifle rounds or smaller. Featuring a whiteboard on one side and a self-healing tackable surface on the other, it serves both educational and protective purposes. Weighing 400 lbs, its smooth casters allow even a small child to move it effortlessly, ensuring quick repositioning for enhanced security in any classroom or high-risk environment. Dimensions: 75"h x 48"w x 3.25"d (32"d with casters).

DoorGuard™ Anti Ballistic Panel

The DoorGuard™ is a mobile NIJ Level III bullet-resistant panel designed to block standard doors and protect against intruders. With a tackable fabric surface, concealed ballistic steel core, and hardwood finishes, it combines security with aesthetics. Heavy-duty locking casters ensure easy mobility and stability, while the self-healing acoustical panel enhances durability. Perfect for schools, offices, and public spaces, the DoorGuard™ offers discreet, lifesaving protection in emergencies.

Dimensions: 36"W x 72"H.

WORKSTATIONS & TABLES

TACTICAL SAFETY

ANTI-BALLISTIC WORKSTATIONS

Protector™ Anti-Ballistic Workstation

This portable workstation provides exceptional security with an NIJ Level III bullet-resistant steel body and NIJ Level IIIA bullet-resistant glass for clear visibility. Ideal for courthouses, it is handcrafted from premium hardwoods and comes with a lifetime guarantee. Features include a locking drawer, keyboard pullout, adjustable shelf, and heavy-duty locking casters. With dimensions of 44" w x 33.5" d x 42.5" h (work surface) and a final height of 56", 62", or 66" depending on glass height. Weight: 375lbs. Ships fully assembled.

Protector Step-In™ Workstation

Designed for high-security settings, the Protector Step-In™ offers three-sided protection using NIJ Level IIIA clear ballistic glass on top, and NIJ Level III steel for the body. Handcrafted in the USA from premium hardwoods (Oak, Cherry, Mahogany, or Walnut) with a lifetime guarantee. Features a locking drawer, flat panel doors, adjustable shelf, and Easy Glide Casters for mobility. Dimensions: 44"W x 33.5"L x 42.5"h to work surface; final height 56", 62", or 66". Weight: 375lbs Perfect for federal facilities, courts, hospitals, and universities. Ships fully assembled.

TACTICAL SAFETY

ANTI-BALLISTIC WORKSTATIONS

Defender™ Anti-Ballistic Workstation

A discreet workstation offering NIJ Level III ballistic protection on all sides, capable of stopping 7.62mm rifle rounds. Features a locking drawer, adjustable shelf, hidden ballistic material, and heavy-duty casters for mobility. Handcrafted in the USA from your choice of Oak, Cherry, Walnut, Maple, or Mahogany, with a lifetime guarantee. Dimensions: 39"w x 27"d x 51"h.

Weight: 375 lbs.

Defender™ Step-In Workstation

A covert NIJ Level III ballistic-resistant workstation, stopping 7.62mm rifle rounds. Handcrafted in the USA from solid hardwood (Oak, Maple, Cherry, Mahogany, or Walnut), it features a locking drawer, lower doors, adjustable shelf, cable management grommets, and heavy-duty locking casters. Customizable with your logo. Dimensions: 39"w x 27"d x 51"h.

Weight: 375 lbs.

Executive Wood Products ensures unparalleled protection by incorporating **NIJ Level III** ballistic steel or fiberglass in its products, designed to stop multiple shots from high-caliber rifles, including 7.62mm rounds.

For applications requiring visibility, such as clear panels or glass, we utilize **NIJ Level IIIA**-rated polycarbonate, capable of stopping handgun rounds and smaller threats.

WHAT ARE NIJ COMPLIANT ARMORS TESTED AGAINST?

EXISTING LEVELS OF PROTECTION

Level IIA Tested to stop 9mm and .40 S&W ammunition fired from short barrel handguns. No rifle ammunition protection.

Level II Tested to stop 9mm and .357 Magnum ammunition fired from short barrel handguns. No rifle ammunition protection.

Level IIIA Tested to stop .357 SIG and .44 Magnum ammunition fired from longer barrel handguns. No rifle ammunition protection.

Level III Tested to stop 7.62mm FMJ lead core rifle ammunition.

Level IV Tested to stop .30cal steel core armor piercing rifle ammunition.

What about 5.56mm/.223 ammunition?

5.56mm ammunition comes in a wide variety of constructions. The rounds with lead cores typically used for hunting and target shooting can be stopped with Level III hard armor plates.

5.56mm JHP hunting ammunition

component to the hard armor plate to stop it. Some Level III have a ceramic/metallic face, but not all. If you have identified the M855 or other similarly designed steel core ammunition as a potential threat,

5.56mm FMJ, M855 "Green Tip" partial steel core ammunition

a Level IV plate is the best choice for protection among the armors on the Compliant Products List (CPL).

Quick Facts:

5.56mm/.223 Jacketed Hollow Point (JHP) ammunition has a lead core. Level III armor or greater is the best choice for protection among the armors on the CPL.

5.56mm/.223 Green Tip Full Metal Jacket (FMJ) ammunition has a part steel core. Level IV armor is the best choice for protection among the armors on the CPL.

5.56mm ammunition designed for military use, with a steel or partial steel core, needs a ceramic or metallic

The above is a snapshot of select threat projectiles and classifications of armors related to these general threats. Refer to NIJ standard 0101.06 for further details.
