Proudly made in the USA.

Since 1982 Executive Wood Products has been designing, engineering, and manufacturing quality wood furniture and fixtures. We have held a GSA Contract since 1995 and are the leading supplier of lecterns and podiums to the federal government in the category of Furniture/Lecterns (71-304). We formed our Protection Assurance Division in 2001 and have designed, engineered, and installed anti-ballistic fixtures and furnishings both nationally and internationally. Courthouses, Schools, and commercial office buildings are a few examples of our applications. Our customers include Supreme Courts, Appellate Courts, Federal Courts, County Courts, U.S Marshals, and every branch of government. All of our furnishings are designed to look innocuous and non-threatening.

Our proprietary 43,000 square feet manufacturing facility gives us the capacity to always meet our deadlines and keep our promises with high quality products and unmatched customer satisfaction. We are experts at packing, shipping, white glove delivery and installation. Executive Wood Products is a family-owned small business whose culture is Total Customer Satisfaction. Give us a call today!

What We Can Do For You

Brief Narrative of Executive Wood Products

Executive Wood Products specializes in ballistic discreet furnishings designed to seamlessly integrate into existing environments while providing enhanced security and protection. Our products are engineered for K-12 school safety, offering ballistic resistance without compromising aesthetics. We manufacture and supply:

- **Ballistic Doors & Windows** – Reinforced security solutions designed to withstand threats while maintaining a traditional appearance.
- **Ballistic Walls, Workstations, and Lecterns** – Protective barriers that blend into classrooms, administrative offices, and common areas.
- **Ballistic Mobile Panels** – Portable and stationary defensive furniture that provides cover in active threat situations.
- **Ballistic Shields & Desks** – Concealed safety measures that offer discreet yet effective protection.
- **Custom Ballistic Projects** - may be available on request.

All products are designed, tested, and manufactured in the USA to meet industry safety standards and enhance school security while maintaining a professional, welcoming learning environment.

Description of Services Offered

Executive Wood Products offers comprehensive safety solutions tailored to the unique needs of your campus. Our team provides:

- **On-Site Safety Assessments & Custom Design Consultations** – We evaluate school layouts to recommend strategic placement of ballistic furnishings for optimal protection.
- **Custom Manufacturing & Integration** – We design and fabricate custom ballistic solutions to match existing architectural aesthetics and security requirements.
- **Professional Installation & Implementation** – Our experienced installation team ensures seamless integration of all security furnishings with minimal disruption to school operations.
- **Training Support** – We provide product training for staff on usage and safety procedures, and long-term customer support.

Our turnkey approach ensures that every school receives high-quality security furnishings, expert installation, and continued support to maintain school safety at the highest level.

STATIC SAFETY

ANTI-BALLISTIC GLASS

Protect your students with high-performance NIJ 3A bullet-resistant polycarbonate glass panels. Engineered to provide superior protection, these panels are designed to withstand handgun threats while maintaining clarity and durability. **Custom-cut to your specifications at \$350/sq. ft.**, they seamlessly fit over your existing windows, offering a non-invasive security solution. Ideal for schools & courthouses, our polycarbonate panels ensure peace of mind without compromising visibility.

STATIC SAFETY

ANTI-BALLISTIC DOORS

NIJ III Bullet-Resistant Door (Slab)

Achieve unparalleled security with our NIJ 3-rated solid wood slab door, expertly crafted with ballistic steel at its core. Encased in premium solid wood, this door combines robust protection against rifle threats with a refined, professional appearance. Designed without windows, it offers maximum privacy and security, making it ideal for schools, offices, courthouses, or other high-risk environments.

\$8,500.00

NIJ III & IIIA Commercial Ballistic Door

Enhance classroom or commercial safety with this all-wood ballistic door, designed to withstand threats while maintaining a professional appearance. The solid wood construction is reinforced with NIJ Level III ballistic protection, while the narrow 6-inch-wide NIJ Level IIIA polycarbonate window provides visibility without compromising security. Perfect for schools, offices, or high-risk facilities, this door offers a balance of durability, functionality, and peace of mind. Smooth operation and expert craftsmanship ensure it's built to last in demanding environments.

Executive Wood Products ensures unparalleled protection by incorporating **NIJ Level III** ballistic steel or fiberglass in its products, designed to stop multiple shots from high-caliber rifles, including 7.62mm rounds. For applications requiring visibility, such as clear panels or glass, we utilize **NIJ Level IIIA**-rated polycarbonate, capable of stopping handgun rounds and smaller threats.

WHAT ARE NIJ COMPLIANT ARMORS TESTED AGAINST?

EXISTING LEVELS OF PROTECTION

Level IIA Tested to stop 9mm and .40 S&W ammunition fired from short barrel handguns. No rifle ammunition protection.

Level II Tested to stop 9mm and .357 Magnum ammunition fired from short barrel handguns. No rifle ammunition protection.

Level IIIA Tested to stop .357 SIG and .44 Magnum ammunition fired from longer barrel handguns. No rifle ammunition protection.

Level III Tested to stop 7.62mm FMJ lead core rifle ammunition.

Level IV Tested to stop .30cal steel core armor piercing rifle ammunition.

What about 5.56mm/.223 ammunition?

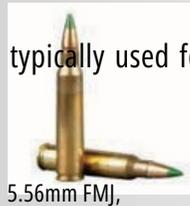

5.56mm ammunition comes in a wide variety of constructions. The rounds have to be stopped with Level III hard armor plates.

5.56mm ammunition designed for military use, with a steel or partial steel core, needs a ceramic or metallic armor plate.

The above is a snapshot of select threat projectiles and classifications. Refer to these general threats. Refer to NIJ standard 0101.06 for further details.

component to the hard armor plate to stop it. Some Level III have a ceramic/metallic face, but not all. If you have identified the M855 or other similarly designed steel core ammunition as a potential threat, a Level IV plate is the best choice for protection among the armors on the Compliant Products List (CPL).

5.56mm FMJ, M855 "Green Tip" ammunition

Quick Facts:

5.56mm/.223 Jacketed Hollow Point (JHP) ammunition has a lead core. Level III armor or greater is the best choice for protection among the armors on the CPL.

5.56mm/.223 Green Tip Full Metal Jacket (FMJ) ammunition has a part steel core. Level IV armor is the best choice for protection among the armors on the CPL.
